REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The IDS filed 5-18-2006 has been reviewed. The prior art of record does not teach or suggest all of the limitations of the allowed claims. Iida et al (US 2003/0157814A), for example, differs in several ways from the allowed claims. Iida et al teaches that the wafer is loaded at 700 degrees C, and the temperature region of from 700-900 degrees C is ramped at a rate for a time of 60 minutes or more (paragraphs 0027, 0014, and 0016 and Fig. 1) rather than maintained at a temperature within the range and that the rate of ramping of the temperature is important to the results (Table 1 on page 4), while the claims recite a thermal treatment at a temperature within a recited range. In addition, Iida et al teaches the bulk BMD density for wafers from different portions of the ingot not differing, while the allowed claims require BMD layer at a particular depth and the absence of a denuded zone, which limitations are not disclosed nor suggested by Iida et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
